BALOCHISTAN EDUCATION STATISTICS

2021-22

MESSAGE OF SECRETARY SCHOOL EDUCATION DEPARTMENT, BALOCHISTAN FOR STATISTICAL BOOK (2021-22)

Modern education management requires comprehensive and reliable data for better educational planning and effective decision making. The information technology has made it possible to provide such data critical for informed decisions.

I am honored to present the Statistical Book on education for 2021-22 prepared by School Education Department. This much needed book provides important information in guiding our journey towards addressing the issues of access to quality education in the province of Balochistan.

It is important to highlight here that School Education Department is making every effort to provide quality educational services for all without any discrimination. In order to ensure such services, it is vital for us to know as to how many children are enrolled in schools and what facilities are available to them; which districts are meeting expectations and which districts need to improve their performance.

The Statistical Book 2021-22 is expected to enrich the evidence-base of School Education Department and stakeholders in addressing the existing challenges and gaps with regard to ensuring access to quality education for all.

Here, I would like to present my appreciation and recognition for the efforts of all those who have been involved in the preparation of this Statistical Book. In particular, I acknowledge the efforts of the staff of Balochistan Education Management Information System (BEMIS) and Performance Management Cell (PMC), who have endeavored relentlessly during the analysis and presentation of data.

I also would like to thank the European Union (EU) and UNICEF for their financial and technical support in the preparation of this Statistical Book for 2021-22.

Sincerely,

Abdul Rauf Baloch

/ Secretary,

School Education Department, Government of Balochistan

MESSAGE OF ADDITIONAL SECRETARY SCHOOL EDUCATION DEPARTMENT, BALOCHISTAN FOR STATISTICAL BOOK (2021-22)

Data driven policy development and decision-making are the hallmark of effective education management practices. Modern day technological advancement has provided us with tools which we can use to analyze key education data for more effective Policy, Planning, and Implementation Unit (PPIU) of the School Education Department, we are always committed to enhance processes for delivery of results on important national and international commitments by enabling participation of all children in quality education.

This important book of data and analysis presents information about access and participation and quality of education which will be of prime importance to the work of PPIU. It provides statistics about schools in relation to enrolment, available space, student transition, teacher availability and trainings and physical facilities, among others, which information can prove vital for effective and efficient equity-based programming in the education department.

Moreover, this data book will also guide district level education management in evidence-based decision making and rationalization of resources to best meet the needs of children, teachers, and communities in a transparent and accountable manner. I strongly urge this tier of decision makers to consult this book for planning purposes.

I would like to convey my earnest appreciation for all staff involved in data collection, processing, analysis, and development of this report. Certainly, this would not have been possible without their persistent effort and commitment.

The support of European Union and UNICEF has been critical to strengthening of EMIS in Balochistan for the past many years. Indeed, the success of our partnership is embodied by this data book.

Sami Ullah Kakar

Additional Secretary/Focal Person PPIU
School Education Department
Government of Balochistan

MESSAGE OF DIRECTOR EDUCATION (S)

Education has the most important role to play in the development of nations and we, at the Directorate of Education (Schools), are remarkably committed to deliver excellent quality education for all children in Balochistan. Accurate, timely and reliable data are cornerstones of modern-day educational planning and management. Data provides an evidence-base for decision making and guides policy development and planning. This statistical book will help all stakeholders a great deal in improving the standard of education and communication about achievement of provincial, national and global commitments.

The data in this report is presented to aid policy development, planning and decision making in areas of access, participation and quality of education.

I would like to thank the leadership of School Education Department for their encouragement, guidance and support. I would also praise BEMIS, PMC and district level data collection and data processing teams without whom the development of this statistical book would not have been possible.

Wahid Shakir Baloch

Director of Education
Directorate of Education (Schools)
School Education Department
Government of Balochistan

MESSAGE OF DIRECTOR BEMIS

The Balochistan Education Management Information System (BEMIS) has been generating information for policy makers and education managers to provide data driven evidence for informed decision making since 1990s. It has been mainly through reforms supported by UNICEF and EU since 2014 which have enabled BEMIS to improve on its responsibilities of data collection, analysis and reporting.

The data presented in this booklet resulted from relentless efforts of data collection teams at school cluster level, data entry units at district and cluster levels and provincial teams who ensured quality data collection, processing and analysis to compile the information presented in this document. I would like to thank the provincial education management information system working group and UNICEF for their zealous efforts and services which led to the development of this statistical book.

Muteeb Afridi

Director BEMIS
Directorate of Education (Schools)
School Education Department
Government of Balochistan

HOW TO READ THE BOOKLET

The information in this book is presented in the form of maps, tables, graphs to show statistics for 2021-22 and trends from 2016-17 to 2021-22. Various features of implements used to express data are presented below to aid understanding and interpretation of data.

BACKGROUND AND CONTEXT

The Balochistan Education Management Information System (BEMIS), prior to the reform initiatives led by the education department with the support of development partners, was a standalone, outdated database not capable of most functions essential to MIS. The capacity gap assessments conducted as a follow up to the sector plan showed that no major changes/upgradations of design had taken place since the establishment of BEMIS in 1991. There was no connectivity with district EMIS and data from districts was transported manually and rarely through email to be entered centrally at the provincial level.

Since 2014, the Education Department has been implementing a reform agenda in areas of access, quality and governance and management of the education sector in Balochistan. As part of this process, the provincial EMIS has received a great deal of attention and support from the department and development partners. Given the limited human resource capacity within the department, selected components of the EMIS have been developed and rolled out. The new EMIS strengthens a decision support system which enables functions such as multi-user remote connectivity, report generation, graphical representation and analysis and data exportability. The operational support system of EMIS provides roles and authority to users within the system.

The revamped Balochistan EMIS is a revolutionary initiative which enables management and administration, research, planning, monitoring and evaluation of the education system. The Balochistan EMIS allows access of information to public on schools and school monitoring reports.

The website can be accessed via www.emis.gob.pk
This report presents statistics of EMIS data based on the census results of 2021-22.

Elements of Balochistan EMIS

EMIS UNITS

Data collection and validation for annual school census in the province are managed by BEMIS, whereas the PMC is responsible for data processing and analysis. The EMIS project under the reform initiative post sector plan 2003-18 was kicked off with EMIS cells (2 in each district on average) where the data entry processes took place. Later in 2017-18 UNICEF established 100 school level EMIS cells with the support of European Union to support the recommended establishment of EMIS units nearest to the source of data, i.e. the cluster hub school. As a scale-up initiative of the education department, all cluster hubs will be equipped to function as cluster level EMIS cells. This will ensure that entry is timely and as free of error as possible. To date, 300 new cluster level data entry points have been established.

UTILIZATION OF EMIS DATA

The EMIS presents data on the education sector and provides a general view on the system's performance. The analysis of the current state of education facilitates education planning and management and provides an evidence base for the formulation of policies. The data presented in EMIS statistical book is intended to facilitate rational distribution of inputs to the sector keeping in view the existing challenges and development targets. The data presented in this statistical book can be used for planning, monitoring and evaluation, identification of challenges and in proposing strategic solutions at provincial, district, cluster and school levels.

Balochistan Education Management Information Life Cycle

DATA CLEANING

Various steps were taken to ensure cleaning of data to enable useful analyses and presentation. These steps included:

Data Validation: The data generated by EMIS is totally dependent on the quality of data collected from schools and entered into the system. Inadequate or incomplete data compromises data quality and ultimately affects the quality of decision making. Various data validation processes, at source and data entry level, were put in place to ensure that prescribed rules about the value of data elements were followed. Specifically, strong validation mechanisms existed at EMIS cells while receiving EMIS questionnaires, data entry level and post data entry practices known as data verification process.

In EMIS data entry application, strong checks have been implemented both on database and front end which flag suspicious data during the data entry stage.

These checks help ensure that values against all data fields have been entered and in the right format such as data type, range of values, missing values, consisten-

cy, total cross referencing etc.

In case errors were found, the questionnaires were returned to schools for rectification. Any questionnaires which were not verified by District Education Officers were also returned.

Data Verification:

During this process, different types of data were checked for accuracy and consistency after the data entry was completed. The data verification process included reconciliation of data sources, comparison with census data of previous years, consistency with other fields, data auditing by comparing aggregate data at each level of the education system (schools, districts and gender etc.).

ABOUT THE STATISTICAL BOOK

Under the new EMIS approach, the education department has conducted annual school census exercises since 2014. This report presents the data of annual school census 2021-22 collected for all levels of education under the School Education Department including primary, middle, secondary and higher secondary schools.

EMIS data 2021-22 has been used for giving an overview of the education system, details of schools, students and teachers. The electronic copy of this booklet is available on the EMIS website of the education department (www.emis.gob.pk). The website also provides an analysis of the data on heat maps, EMIS school profiles and Real Time School Monitoring reports.

Overall, data of 15,096 schools has been presented. The total number of schools in the Balochistan EMIS master data is 15,096 of which 100% returned the census questionnaire to the respective EMIS units.

BYTES

- Ratio of girls to boys enrolment reflects the level of girls' access to education compared to that of boys. This is calculated by dividing girls' enrolment at a given education level to the enrolment of boys at the same level. A value of less than 1 indicates that there are fewer girls than boys in the education system while a ratio higher than 1 indicates proportionately more girls enrolled as compared to boys. A score of 1 reflects equal enrolment for boys and girls.
- Balochistan reported girls to boys enrolment ratio of 0.76 in 2021-22.
- District Quetta has reported girls to boys enrolment ratio of 1.20 in 2021-22.
- Low girls to boys enrolment ratio has been reported in districts Dera Bugti (0.39), Killa Abdullah (0.28), Naseer Abad (0.53), Sherani (0.36) and Sohbat Pur (0.48) in 2021-22.

- Gender Parity Index (GPI) is the ratio of the female effective transition rate from primary to middle to the male value for the same indicator. It is calculated by dividing the female value for the indicator by the male value. A GPI equal to 1 indicated parity between females and males. A value less than 1 indicates disparity in favor of males and a greater than 1 indicates disparity in favor of females.
- At the provincial level the GPI of effective transition rate from primary to middle is 0.98.
- District Sherani has reported the lowest GPI of effective transition rate from primary to middle at 0.19.

BYTES

- Survival rate to grade 5 is the propor on of a cohort of pupils who reached grade 5, expressed as a percentage of pupils enrolled in the first grade of a given cycle in a given school year. This indicator is used to show the extent to which the school system can retain pupils, with or without repe on, and reflects the dropout rate. It is also used to measure the impact of dropout on internal efficiency.
- At the provincial level the survival rate to grade 5 is 69.0%.
- At the provincial level the survival rate to grade 5 for boys is 66.2%.
- At the provincial level the survival rate to grade 5 for girls is 72.9%.
- Districts Duki and Sherani have reported the lowest survival rate to grade 5 at 24.2% and 29.7% respectively.

BYTES

- Student Teacher Ratio (STR) is an indicator used in educational planning to indicate the quality of teaching-learning process. A low STR shows that the teacher will provide better quality education.
- The overall STR in middle schools in Balochistan is 18.5 which means that every teacher has an approximate number of 19 students to teach.
- The provincial STR for boy middle schools is 17.4 and for girl middle schools is 20.2.
- Districts Awaran, Gwadar, Naseer Abad and Sohbat Pur have reported an STR of more than 30 students per teacher in middle schools.

PROVINCIAL TREND

STUDENT TEACHER RATIO BY DISTRICT AND GENDER (HIGH AND HIGH SECONDARY SCHOOLS) 2021-22

BYTES

- Student Teacher Ratio (STR) is an indicator used in educational planning to indicate the quality of teaching-learning process. A low STR shows that the teacher will provide better quality education.
- The overall STR in high and high secondary schools in Balochistan is 20.8 which means that every teacher has an approximate number of 21 students to teach.
- The provincial STR for boy high and high secondary schools is 20.2 and for girl high and high secondary schools is 21.6.
- Districts Gwadar, Chaghi, Jaffar Abad and Naseer Abad have reported an STR of more than 30 students per teacher in high and high secondary schools.
